

lago_ecosystem

What is LAGO Ecosystem?

Lago Ecosystem is a build system for quick prototyping and working with the Zynq SoCs.

Quickstart with the [Red Pitaya](#)

1. Requirements for Ubuntu 16.04

1.1. Download [Vivado HLx 2016.4: All OS Installer Single-File Download](#).

1.2 Run

```
$ sudo apt-get install curl
$ cd ~/Downloads
$ curl https://raw.githubusercontent.com/lharnaldi/lago_ecosystem/master/scripts/install_vivado.sh | sudo /
$ sudo ln -s make /usr/bin/gmake # tells Vivado to use make instead of gmake
```
